# The Learning Survey 

Trusts for Impact<br>Trusts For Impact - Pupil Survey T1

Schools: AN DARAS MULTI ACADEMY TRUST - St Stephens Community Academy

## Introduction

## Response averages

The group and school average view is useful to quickly get an overview of the survey results. However, to have a complete understanding of the survey results, it is necessary to review the more detailed bar graphs for each question. The average responses do not show whether student responses are grouped around one value or spread out.
In calculating the group and school averages, each possible response is given a value from 1 to N (number of available responses), where 1 is the lowest-ranked answer (e.g. "not at all" or "not useful at all") and N is the highestranked one (e.g. "very often" or "very useful"). The average response is the mean of all the responses to a question (in a selected group or in the school).
For these purposes, a group can be a selected class, subject, or teacher for which the average response is calculated.

## How often do you find these lessons interesting?

| Always | $7(9 \%)$ |
| :--- | :---: |
| Often | $29(36 \%)$ |
| Sometimes | $32(40 \%)$ |
| Rarely | $10(13 \%)$ |
| Never | $2(3 \%)$ |

## Result colours

Bar graphs and line graphs are shown on a colour scale from red to dark green. The same scale is used with numeric results, where the colour represents the response closest to the result.
Graphs that do not represent a scale are shown in purple.

## Differences in respondent count

For each question we have added the amount of respondents; how many students, parents or teachers have responded to a question. It is not possible to skip a question, but it might be that a respondent has paused their survey and has not responded to all of the questions.

## Positive responses

The percentage of positive responses is calculated by determining the proportion of the responses that belong to the top half of the possible responses, excluding the middle response when the number of possible responses is odd.

## Filtered average

This is the average of the filtered subset of results, based on the selection made when downloading the PDF - as indicated on the cover page of this document.

## Expectation

1) I have high expectations about gaining high grades
